PROVISIONING BOUNDARY
Signing authority keys remain here
Review + signing workstation
Identity and permission authority
Required runtime material only
Required runtime material only
RUNTIME HOST BOUNDARY
Host account and file permissions are separate controls
Listener process
/security_lab/listener
Application grant: subscribe /chatter
Talker process
/security_lab/talker
Application grant: publish /chatter
Untrusted peer / input
No accepted lab identity
authorized delivery
/chatter data
attempted communication
UNTRUSTED TRANSPORT
DDS authentication + policy + configured protection
ROS infrastructure traffic reviewed separately
Teaching model: no actuators or cloud.
Separate enclave paths do not create memory isolation.
DDS cases observed; host and safety boundaries not established.
